

Legrand offers connectivity to fit your needs

Legrand product solutions make your environment more flexible and fit effortlessly into the spaces where you work, share and connect. Our cables are designed to work with most desktop PCs, laptops, monitors, scanners and printers, as well as gaming consoles, audio and video equipment.

HDMI®

HDMI® is the most popular audio/video connection for most consumer electronics today. The HDMI® signal carries digital audio and video at resolutions up to 4k supporting Ultra HD and is the digital replacement for analogue video standards.

VGA

VGA, or HD15, is the analogue connection used to connect computers and laptops to projectors or additional monitors. In light of the Analogue Sunset, VGA is considered a legacy connector and will be replaced with a digital HDMI® or DisplayPort connector in the near future.

DVI

DVI products from Legrand include cables, adapters, extenders and splitters, all for use with devices and displays with DVI connectors on them. Use these DVI products to send high-definition, 1080p video from a DVI-enabled device to a display.

Cat6

Cat6 patch cables are used for Ethernet connections. In addition, couplers and cable management products are available for extending your signal and organising your network.

DisplayPort

Supporting resolutions up to 4k (4096x2160p), DisplayPort is perfect for connecting high-definition digital audio/video devices to displays.

Audio/Video

Legrand has solutions for both analogue and digital audio/video signals and our products are designed to meet or exceed the limitations of audio/video signal distribution.

	Legrand Retail Cat. numbers	Material Description
VIDEO	0 398 51	1M HIGH SPEED HDMI 1.4 (4K) WITH ETHERNET CORD
